28.82%

Mining test rate
55.07%

COVID DEATHS

MITIGATING THE 4TH WAVE AND GETTING BACK TO NORMAL

Vaccinating as many employees and community members as possible will reduce transmission of COVID-19 and prevent serious illness and death.

We need to continue to be vigilant and continue to practice all the NPIs that we have developed since the start of the pandemic.

As an industry we have set ourselves a target of achieving 80% vaccination in the coming weeks.

80% target
