

# Don't wait until it's **too late**

By the time you notice that you can't hear, it may be too late.

If you don't protect your hearing, the result could be disabling hearing loss or permanent.

You will lose more than your hearing when you have noise-induced hearing loss.

Over-exposure to loud noise is dangerous. If you lose your hearing, the consequences, now or later in life, can include:

Losing your physical stability and balance

Becoming socially isolated due to deafness

Difficulty in daily interaction and communication with others

Loss of work and income if you can no longer perform tasks

Protect your hearing
