

REGHARDT PRETORIUS

Vice President Engineering: SA Region Technical, Sibanye-Stillwater

Reghardt Pretorius is the Vice President of Engineering for the South African region of Sibanye-Stillwater, the world's largest producer of platinum and palladium. He has over 18 years of experience in the mining and metals industry. He holds a Government Certificate of Competency in Electrical Engineering from the Department of Minerals and Energy and has completed various leadership and management programmes from reputable institutions.

His core competencies include operations management, electrical engineering, mechanical engineering, project engineering, and project planning. He is responsible for driving and actively participating in the formulation and review of the overall long-term strategies for the Engineering function, aligning them with regional and global business objectives and vision. He also ensures the implementation of best practices, standards, and policies for the safe installation, maintenance, and operation of all machinery and equipment across surface and underground operations.

Reghardt leads and empowers a team of over 500 engineers and technicians, facilitating cross-functional collaboration and innovation. His mission is to enable and support the sustainable and profitable growth of Sibanye-Stillwater, while ensuring the health and safety of all employees and stakeholders.
