The Minerals Council South Africa notes the corrections to the Draft Mineral Resources Development Bill

Johannesburg, 11 June 2025. The Minerals Council South Africa notes the gazetting of two corrections to the Draft Mineral Resources Development Bill.

The Minerals Council continues to review the Bill amending the Mineral and Petroleum Resources Development Act and we will submit our perspectives within the scheduled timeline of 13 August 2025.

The Bill in its current form does not encourage or sustain the growth and investment that the mining industry needs to realise its full potential to create employment, stimulate the economy and fulfil its social mandate.
