

KHANANI RAMOSHABA

Adoption Team Manager: Noise, Minerals Council South Africa

Khanani holds a B-Tech in Environmental Health, a Master's Degree in Public Health from the University of Johannesburg, and an Advanced Certificate in Mine Environmental Control. She is also a Registered Occupational Hygienist with the Southern African Institute of Occupational Hygiene.

Khanani's professional journey in Occupational Hygiene began as an intern at AngloGold Ashanti's TauTona Mine, progressing to the role of Occupational Hygiene Specialist at esteemed organisations such as Vedanta Zinc International, Exxaro Resources, and Northam Platinum.

Her comprehensive expertise extends to the regulatory landscape governing the South African Mining Industry, garnered during her tenure as an Inspector of Mines with the Department of Minerals and Petroleum Resources in the Free State.

Currently serving as an Adoption Team Manager: Noise at the Minerals Council of South Africa under the MOSH Learning Hub, dedicated to fostering a culture of continuous improvement within the mining industry. This involves identifying, documenting, demonstrating, and facilitating the widespread adoption of leading practices to mitigate the major risks in health and safety areas, such as Noise.

A significant aspect of Khanani's professional pursuits involves her passion for research, with a particular emphasis on innovative solutions aimed at enhancing the health and wellbeing of employees in the South African Mining Industry.
