

LINDOKUHLE ZWANE

GBVF Project Coordinator, Minerals Council South Africa

Lindokuhle Zwane is a young mining professional and GBVF specialist reshaping what safety and sustainability means in the industry. She positions GBVF as a core health and operational priority, not a side issue. She leads the national partnership supporting Thuthuzela Care Centres and drives survivor-centred initiatives across Minerals Council member companies, championing safer, more inclusive workplaces for Women in Mining.

Lindokuhle is part of a bold new generation working to transform the narrative that "mining is good for the economy but tough on people". She uses her voice to influence for a sector that is socially conscious and inspiring young talent as a career choice.
